BURSA CHAMBER OF COMMERCE AND INDUSTRY MOSQUE AND SCHOOL

Steel Fabrication and Assembly Contract

CUSTOMER

Bursa Chamber of Commerce
and Industry

LOCATION

Bursa, Turkey

PERIOD

February, 2017 - August, 2017

SERVICES PROVIDED

CERM-EX Inc has been
responsible for the steel
fabrication and assembly process
of BTSO Mosque and school in
Bursa.

TONNAGE CAPACITY

250 Ton

PROJECT AREA

18,000 m²

The mosque and school was design by Piray Architecture. The project is located in an area of approximately 18,000 square meters. The outer Facade of the mosque was made from Titanium zinc which is an adaptable material to the geometric patterns and shapes of the mosque. This material also adds a different atmosphere to the appearance of the mosque.

Due to the complex geometric patterns and shapes of the mosque, 70 percent of the mosque was built with steel structure.

The success was achieved by appropriately organising the conditions and requirements of the project, selecting the right design-build contractor through the competitive tender, establishing the rules for design and construction process, monitoring the progress in accordance with the established rules, and providing appropriate technical advices.
