# SALT FACTORY IN TURDA, ROMANIA

## Structural Design, Steel Fabrication, and Assembly Contract

### CUSTOMER

Sistemas Technology A.S.

### LOCATION

Turda, Romania

### PERIOD

September, 2019 - February,  
2020

### SERVICES PROVIDED

CERM-EX has been responsible for the structural design, steel fabrication and assembly process.

### TONNAGE CAPACITY

200 Ton

### LAND AREA

5,300 m<sup>2</sup>

We maintain our reputation because we invest in attracting and developing the most inventive and experienced of structural engineers. They are proficient in connecting the demands of geometry, materials and loads (gravity, wind, seismic).

Equally, we make sure that our structural engineers work closely with clients and collaborators and stay up to date with industry issues so that they can innovate in response to real-world challenges and constraints.

The salt factory was designed by our team and the fabrication of the steel structural elements took place in our steel fabrication facility in Bursa. The project timeline was very challenging and to meet these time restrictions, we designed the structure using modular construction techniques to shorten the assembly process during the cold weather conditions in Turda and ensure our workers safety.
