GAZIANTEP NEW STADIUM

Steel Fabrication and Assembly Contract

CUSTOMER

T.C. Prime Ministry Housing
Development Administration

LOCATION

Gaziantep, Turkey

MAIN CONTRACTOR

May İnşaat, Egemen Group

PERIOD

August, 2013 - December, 2016

ARCHITECT

Bahadır Kul Architecture

SERVICES PROVIDED

CERM-EX Inc has been
responsible for the steel
fabrication and assembly process
of the stadium.

TONNAGE CAPACITY

2,750 Ton

PROJECT AREA

115,000 m²

Designed in 2012, the stadium is located 10 kilometres away from the city centre. Gaziantep Stadium entered construction started in 2013, following the selection of May and Egemen İnşaat as contractors. Preparatory work began in May and actual construction supervised in late August. The new location offered over 158,000 m² for development that includes 1,363 parking spaces.

Initially two years were expected enough for the project but this time frame proved insufficient. Structurally it almost went along the plan. One by one, each stand was raised as part of a massive monolithic structure (in this order: west, south, east and north) and by the end of 2015 all of them were even covered.

However, following installation and furnishing works lasting all of 2016, opening was only possible in January of 2017.

And it was a bitter one with only a third of all seats occupied and the home side losing to Antalyaspor 0:3.

The double-tiered stands were created with roughly 36,000 people in mind, though with some room for expansion. However, this compact seating bowl is fairly standard when compared to the original approach used outside.

Utilising only simple, cheap and already well known elements, Bahadır Kul Architects managed to create an original unique design. The stadium was covered with strips of membrane and then with a geometric skeleton covered in composite panels. Coloured black and red, these represent the colours of Gaziantepspor and allow the stadium to change colours as the beholder passes by.
